Attorney Duvall's Opinion Respecting

an Assessment. Mr. Nelson E. Weatherless several days ago applied to the District Commissioners for the cancellation of the water main tax against part of lot 96, Wright & Dole's subdivision of Mt. Pleasant, and the matter was referred by the Commissioners to their attorney. The water registrar reported the case is similar in all respects to that of Michael White, wherein such an assessment was quashed by the Commissioners upon the advice of the attorney for the

District.

The water main in question was laid by the Judson Pneumatic Railroad Company several years ago on Brightwood avenue between Florida and Whitney avenues, and was subsequently purchased by the District. The assessment against Mr. White's property was quashed because the act of the legislative assembly of the District of 1873, authorizing the assessment of the cost of laying water mains and erecting fire plugs against abutting property, contemplated water mains and fire plugs laid or erected by the municipality, and not water mains laid by private individuals or

or erected by the municipality, and not water mains laid by private individuals or corporations, and subsequently purchased by the municipality.

These being the facts, the attorney for the District has advised the Commissioners that he entirely concurs in his predecessor's view of the law, and is, therefore, of the opinion that the water main assessment against Mr. Weatherless' property should be canceled.
